Inspection Reporting Overview

Teletrac's paperless Driver Vehicle Inspection Reports provide improved compliance management, while optimizing vehicle safety and maintenance planning.

Teletrac's paperless Driver Vehicle Inspection Reporting solution provides the driver with fast, intuitive submission of pre-trip and post-trip inspections. These reports are filed electronically, giving the following benefits to the fleet manager:

- Real-time receipt of post-trip and pre-trip inspections.

- The ability to easily create FMCSA compliant electronic reports for tractors and trailers.

- Faster notification of asset defects leads to reduced downtime.

- The abillity to easily flag vehicles that have bypassed inspection reports.

Driver Vehicle Inspection Report

Replaces paper inspection reports while retaining compliance.

Goals

Compliance

Highlights

- Run reports centrally for all pre-trip and post-trip inspections.
- Replaces the paper inspection reports that the driver would usually submit.
- Captures mechanic's remarks and shows time-stamped status updates, helping improve clarity over paper forms.

Advantages

- Beneficial for paperless compliance with FMCSA pre-trip and post-trip inspection regulations.

View the cycle of a vehicle inspection, including vehicle defects reported by the driver's pre-and post-trip inspections and the mechanic comments.
